addition &  
subtraction

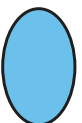

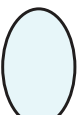

$$5 - 4 =$$

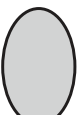

$$6 - 3 =$$

$$1 + 4 =$$

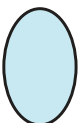

$$2 + 5 =$$

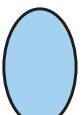

$$1 + 1 =$$

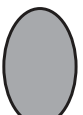

$$3 + 1 =$$

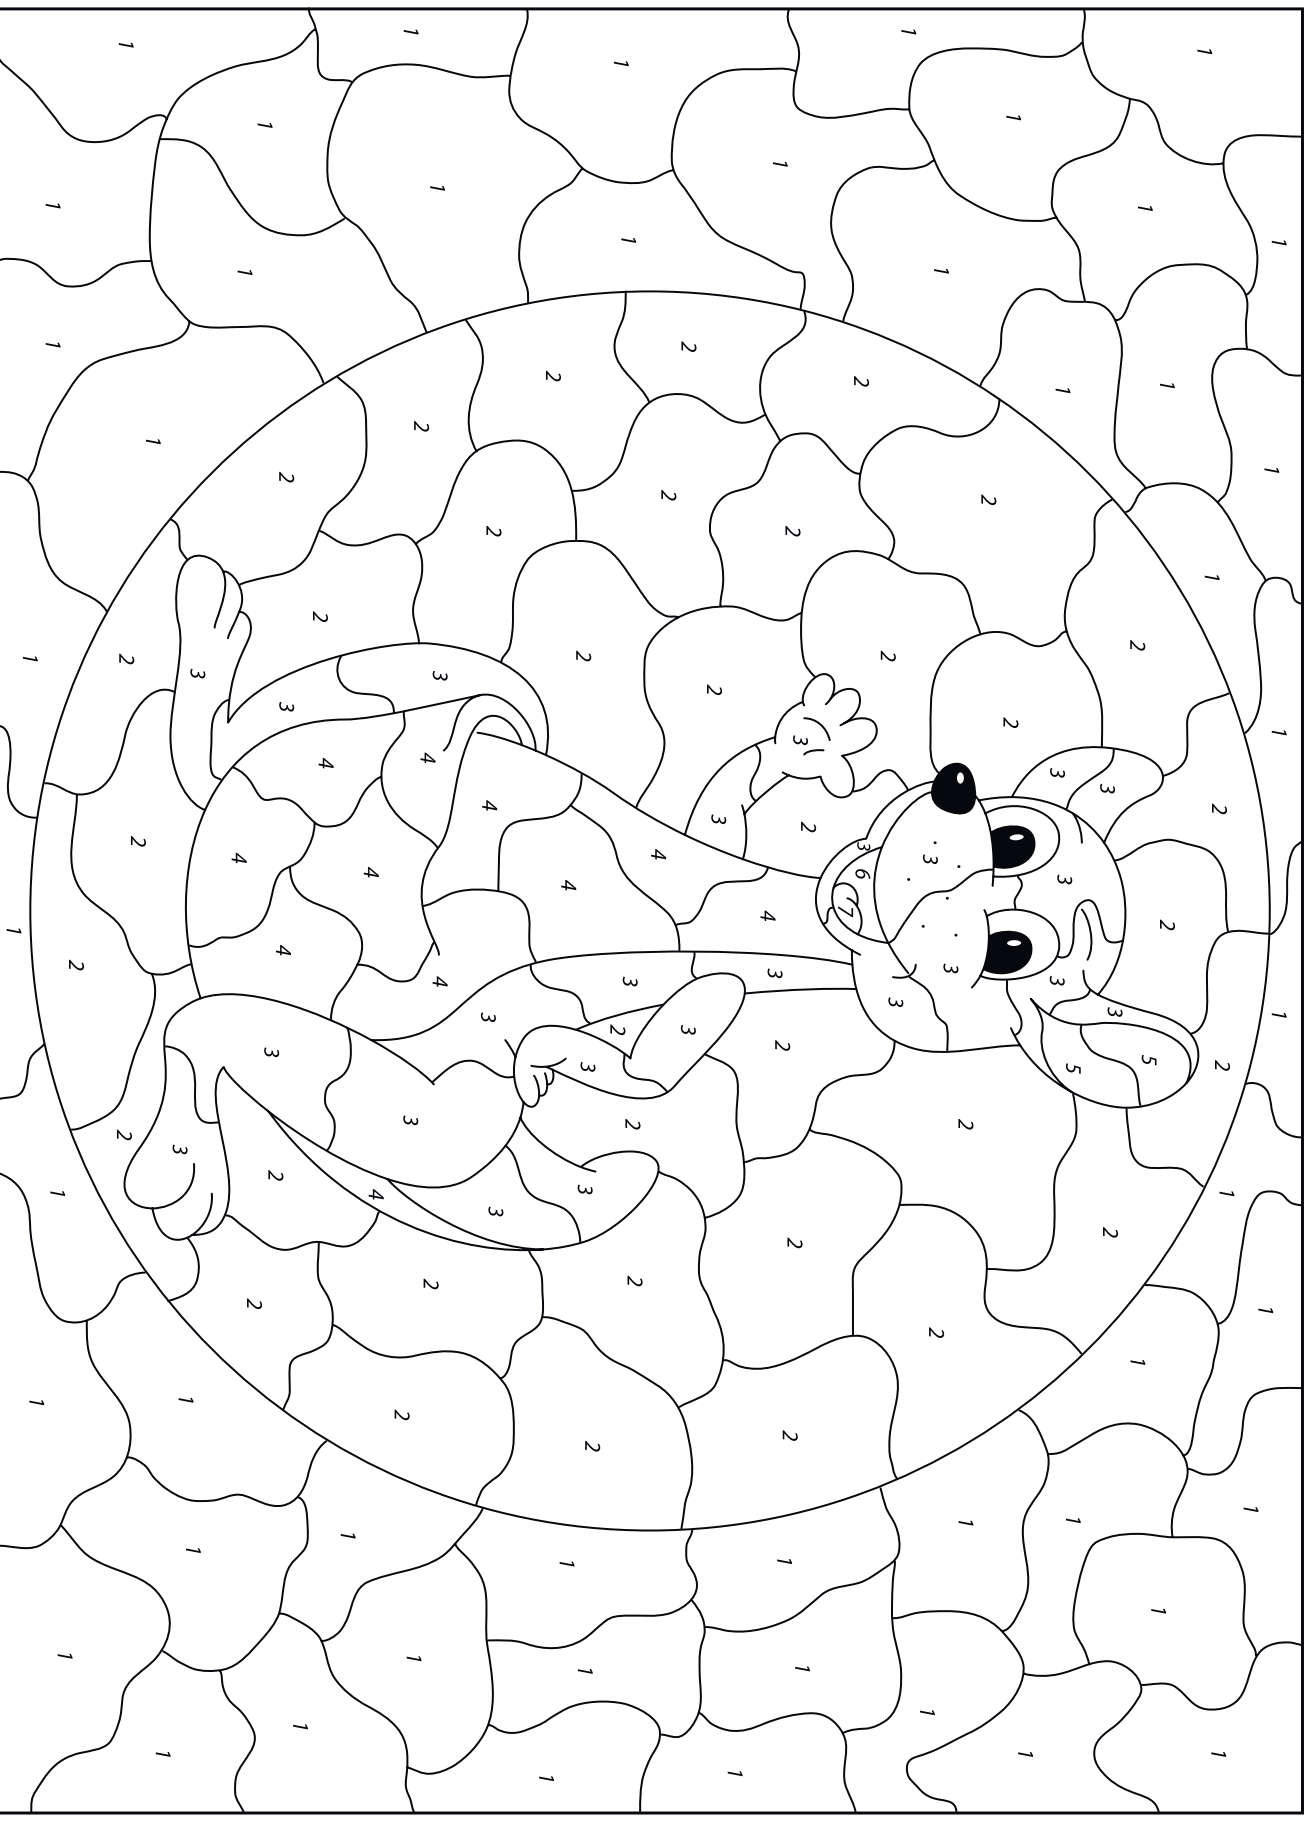

$$5 + 1 =$$

$$4 + 4 =$$

$8 - 7 =$

$5 - 3 =$

$7 - 4 =$

$3 + 1 =$

$2 + 3 =$

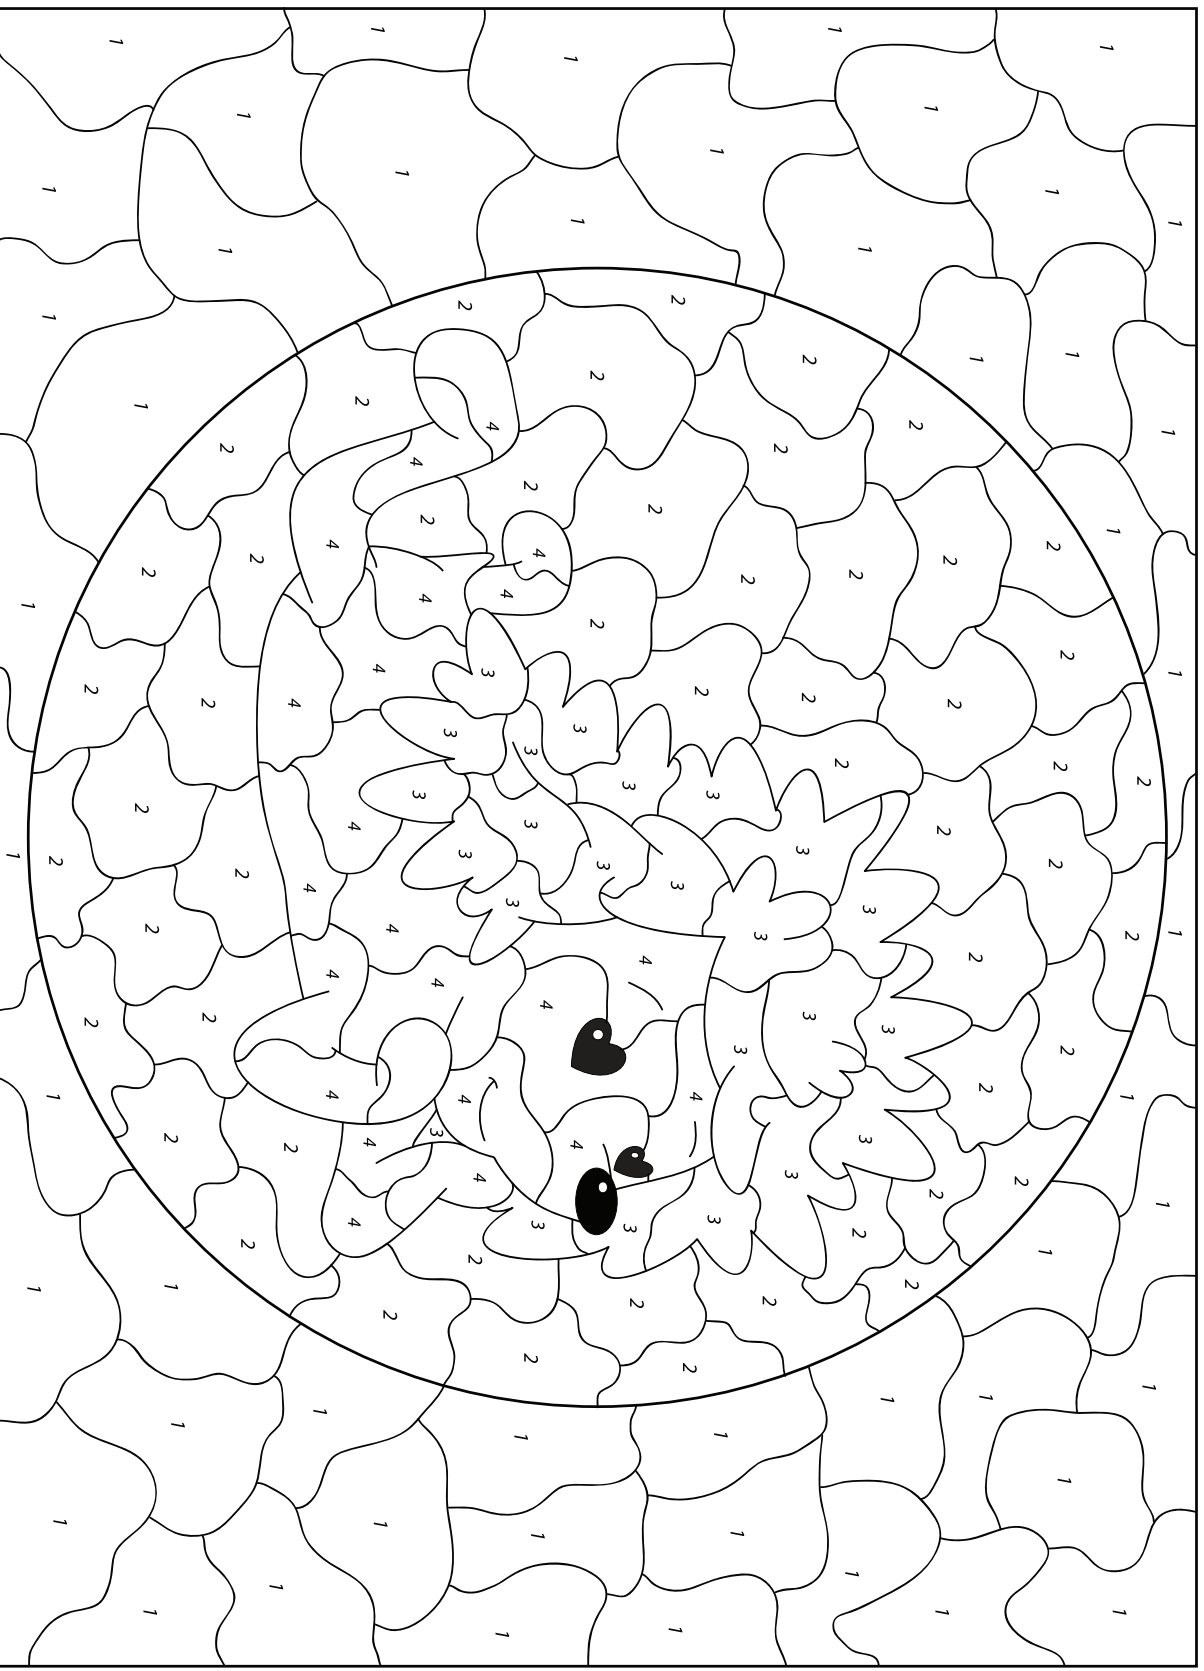

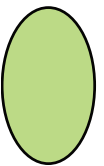

$9 - 3 =$

$2 + 5 =$

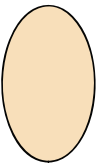

$$3 - 2 =$$

$$3 - 1 =$$

$$1 + 2 =$$

$$3 + 1 =$$

At Smart Bubblegum, our goal is to make a positive impact on world literacy. In most educational systems, children can easily be left behind due to the fact that they are taught in a group setting, versus an individual basis.

Children learn at different paces resulting in some missing out on important basics, as well as needing extra practice in general to achieve a level of competency.

Educational apps provide a perfect solution for this dilemma. As of March 2017 there were 2.2 million apps in the App Store, with educational apps being the third largest category. Though there are a lot of great educational apps out there, finding them can be a bit of a needle in a hay stack. Our team of educational experts have the goal of finding and testing these treasures for you, saving you money and time, while providing you and your child with real solutions.

Here is one of our suggested apps that we found in the hay stack:

### **Math Subtraction & Addition (Ages 6-8)**

- Free to try with two purchasing options to continue play.
- 200+ addition and subtraction puzzles that cover 20+ math levels and reviews.
- Math lessons that include adding single digit numbers, adding doubles, adding near doubles, making 10 to add 9, adding 10s, and various subtraction lessons too.
- Gameplay that is structured around 24 missions that must be completed to earn monsters.
